### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: Livingston shows an optical source (figure 1 Ref 12), focusing optical member (figure 2 Ref 50), a micro mirror array (figure 2 Ref 52), and a transmission optical element (figure 1 Ref 12 inherently shown within the optical source). However Livingston does not show a processor that is able to select a resolution level of controlled radiation patter of narrower beam size based on a previous lower resolution scan of a greater beam size over a greater area.

Landau shows an optical device for measuring distance between the optical device and an object that comprises an optical source (figure 1 Ref 100), a focusing optical element (that is inherent in figure 1 Ref 100), and a processor for selecting a resolution level of controlled radiation patter of narrower beam size based on a previous lower resolution scan of a greater beam size over a greater area (column 3 lines 1-25). It would have been obvious to modify Livingston to include the scanning processor as taught by Landau because this offers the ability to determine where the target is within a large area relative to the target. However neither Livingston nor Landau shows a scanning of a background of an object and then the scanning of the foreground of an object as described by the applicant in claim 1 of the application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
